### **ANNUAL SCREENINGS**

Each year students are screened for a variety of medical conditions. Parents will receive written notification if their child is unable to successfully complete a screening along with a referral to their health care provider for follow up. According to the Massachusetts State Regulations, the following screenings will be performed based on the student's age.

7-9 year olds----vision, height, weight screening, hearing  
10-11 year olds---vision and scoliosis screening  
12-13 year olds---vision, height/weight, scoliosis, and hearing  
14 year olds--- scoliosis, vision, and hearing  
15 year olds---vision, height, weight screening, and hearing  
16 year olds---height and weight screening

All screenings will be performed privately by the nurses in the nursing office. Please note that completed health screening referral forms need to be returned to the nurse as soon as possible. Accurate and timely follow up to these screenings ensures the best result for your school age child.
